Design Brief: The expression of Artificial Intelligence

HAL9000

A space Odyssey

No dynamic expression - The evil is carried within the calm.

"With a single static image and a flat monotone voice, Kubrick et al. created one of the most three-dimensional villains on film"
(Pynadath 2001)

[Youtube link](#)

REHOBOAM

Westworld Season 3

More dynamic expression. A heavy, omniscient evil through visual representation and drone like sounds

"The system itself looks as if Bjarke Ingles designed an apartment building to resemble a marble, or a robocop helmet: It's big and round and features circulating red lights. So basically a rotund Hal 9000."

(Clair 2020)

DROIDS DROIDS DROIDS

Star Wars

Cute ♡

"The artificial intelligence in the Star Wars Universe far surpasses any that can be conceived yet here on Earth. Droids programming enabled a caring side to be displayed, as with droids such as protocol, medical and servant variants "

(Bambrook, n.d)

Design challenge:

Prototype a specific
AI expression

Agenda:

1. Download handout!
2. Get snacks!
3. Look at handout!
4. Get coding! ❤
